Admin Feedback —

1- i had a look at at the admin - On the Dashboard- is missing things like - todays new user , builders - landlords - upcoming expiring account - todays booked jobs and builders - new booked jobs - Users profile on the admin side is missing lots of small info as this is Laravel admin there is lots of templates of lots of basic features i do not see that on our admin ?

2- On the user side we are missing posted jobs- todays booked jobs - last visited the site type of the posted - non email sent to the user - so on. Who the user awarded the job to - booed builders.

3- We are missing - pages edit pages - add new pages - so on .

4- Admin profile is missing name email change email - add subadmin -premisson type ? remove subadmin ban subadmin .

5- On the Builders side dashboard -

5A- booked builders today this week this month , 3 months ago 6 months ago - 12 month ago so on.

5B- profile - is missing reviews profile pic- member since- package type - next payment so on .

5C- map - all the basic things i do not see much on the admin ??

6- I try agin to reg the step 1 works i will re test it after i active my twilio account so i see the text alerts coming from them. in less is ok to do it now ?

6A- please see the list of categories. 6B- how the builder will add the social links?

Electrician

A great job title typically includes a general term, level of experience and any special requirements. The general term will optimize your job title to show up in a general search for jobs of the same nature. The level of experience will help you attract the most qualified applicants by outlining the amount of responsibility and prior knowledge required. And if your position is specialized, consider including the specialization in the job title as well. But avoid using internal titles, abbreviations or acronyms to make sure
